① ServiceNow recommends creating custom tables in scoped applications. To learn more about creating scoped applications, click [here](#). 

A table is a collection of records in the database. Each record corresponds to a row in a table, and each field on a record corresponds to a column on that table. Applications use tables and records to manage data and processes. [More Info](#)

* Label	Employee Test	Application	Global 
* Name	u_employee_test	Create module	☒
Extends table		Create mobile module	☒
		Add module to menu	-- Create new --
		New menu name	
		Remote Table	☐
